2023/24

Your go-to **AV** guide

Bright Ideas

2023

“ Welcome to the latest edition of our Bright Ideas publication! This year is better than ever and is packed with the latest and greatest products available from our manufacturer partners, all available via your local GVAV team.

In the last 12 months we have strengthened our branch network with the addition of a new branch in Dundee, new premises in the North East and (in case you haven't heard) a new 21,000ft² Head Office and branch facility covering London and the South East, further demonstrating our commitment to providing facilities dedicated to support our customers across the UK.

We have seen recent improvements for many products within the supply chain, but there are some key product categories that are still working towards greater availability. Therefore, careful planning and early commitment is still required to ensure projects are delivered without risk.

Where longer lead time items are needed, please speak to your local GVAV team who will ensure you get up-to-date information to ensure you can feel comfortable that your projects are well managed and that stock will be available when you need it.

I hope you find your new **Bright Ideas** a fantastic audio visual encyclopaedia at your fingertips! ”

Quantum

An electrical height adjustable presenter with a 15U rack cupboard with desktop widths from 1200mm – 1800mm. This model is available as a 2200mm wide double cabinet desk or an 1800mm wide single cabinet desk. Features concealed void beneath desktop for hiding cables, and desktop mounted equipment giving greater flexibility. A wider rack cupboard with a fully removable lockable rear panel. Finished to the RAL colour of your choice, with optional graphics and logos.

Chester Podium

A space-saving solution for smaller or flexible teaching spaces. The Chester Podium is ideal for users who don't need space for a local PC. It has a 7U vertical rack in the stem, with 9U of half-rack space above. Full cable management through the base and stem. Hidden castors allow easy reconfiguration of teaching spaces.

Alpha Presenter

The ever-popular Alpha Presenter range is available as fixed height or electrical height adjustable, teaching desks, lecture theatre desks and lecterns. The 15U, 16U or 18U cabinets have lockable doors and hatch to access AV components easily.

Delta

The Delta 1800 desk provides a larger working area with 15U of rack space for hybrid teaching. Cable management is provided through the base and underside of the desktop. Developed to fit in our popular Delta Presenter range, it gives the same level of value and quality. Available in any of the RAL shades.

Rhobus Stands & Trolleys

The complete corporate communications platform. The Rhobus range of stands and trolleys answers all the needs of the corporate user - from boardroom to prestige exhibitor. Ample capacity is provided within the central mast for cabling, codecs etc, all accessible through a locking door.

RH100	single screen	33 - 70"	up to 80kg
RHBD100	bolt down	33 - 70"	up to 80kg
RFWSH	floor-to-wall	33 - 70"	up to 80kg
RH200	twin screen	33 - 70"	up to 80kg

Add -HD to part codes for screens up to 110" and 150kg.

Presenter Wall Mounted Control Desk

Ideal for small lecture theatres or anywhere where space is limited. Folding surface is ideal for laptop, notes etc. Unit is designed to be functional yet compact, with many control panel options.

Lockable cabinet is provided for a PC with access to PC ports and power through the side of the unit. A 3U rack strip is built in. Options include UK two gang aperture, plus any control panel features required.

UFPL08 White or black cabinet finish

The Mentor Lecturer's Desk

Provide lecturer with a professional central desk facility. Change lighting, audio, content and video sources from one place.

Each Mentor comes with a hinged desk, control housing and monitor arm. Available with a range of table top finishes and cabinet colours.

UFMD13 Range of cabinet and desk top finishes

Ceiling Suspension Trade Packs

'Package priced' kits that provide simplicity and convenience for screen suspension.

This trade pack combines the necessary ceiling plate, column and PZW1 universal tilting screen mount for a typical single screen suspension installation. The KP kits come with a 1000, 2000 or 3000mm UNICOL chrome column as standard. Ideal for transport and retail environments that may require many solutions across a series of stores or as a ready-to-go solution.

ATND1061

Beamforming Ceiling Array Microphone

The **ATND1061** Beamforming Ceiling Array Microphone is an ideal solution for conference rooms, boardrooms, and meeting spaces large and small. The microphone may be used singly or in multiples (for larger meeting spaces) to capture every person speaking in a room with clear, natural audio that reduces distracting environmental sounds. A state-of-the-art professional product in a familiar form factor (roughly the size of a wireless access point), the **ATND1061** is easy to install, set up, and operate.

Now certified for use with Zoom Rooms and Microsoft Teams Rooms as part of a Q-SYS System.

Crestron Flex Video Conferencing

Meet with success

Easy to use. Simple to deploy. A consistently high quality experience for every user in every type of space. Video conferencing, content sharing, scheduling, management, and support integrated into one platform with one goal: help your organization collaborate at its best.

Wireless Presentation, Conferencing and Collaboration

Designed for how we work today

AirMedia® technology makes it simple for anyone to connect instantly, present confidently, and bring meetings to life flawlessly from any device, offering a consistent user experience throughout your organization, for guests and employees. No cables. One interface in every room, on every device.

Room Scheduling Solutions

Maximize workflow and increase productivity

Our room scheduling does more than make it easy to book a space. It gathers intelligence, facilitates productivity, and opens possibilities so that your organization keeps moving. And it does it all easily and effectively, without you needing to couple your software and hardware.

Crestron DigitalMedia™

The send any content anywhere solution.

One platform answers every communication need. Presentation. Content sharing. Digital signage. Corporate messaging. Video walls. Active and remote learning. E-gaming. And more. All made possible by the widest range of connectivity options to distribute AV and control signals. From a small meeting room to an entire building, campus, or command center, DM® has you covered.

Intelligent Video

Give everyone an equal seat at the table - onsite or remote

Non-verbal communication is essential to keeping participants in hybrid meetings fully engaged. Our intelligent video solutions, featuring presenter tracking, group framing and dynamic composition, consistently deliver an excellent experience in every space, for every participant.

Global Technology Operation Management

Manage all your room systems easily - on one platform

From personal spaces to lecture halls, lobbies to lounges, esports to video walls, you can see and control all your digital workplace and content distribution technology everywhere. Crestron XiO Cloud® platform gives you everything you need to keep rooms working, meetings moving, and teams productive.

In a way that sets you apart.

Solutions for HyFlex Learning

Improve Outcomes for Hybrid, Remote, and In-Person Learning

Extron has flexible products that help educators deal with teaching challenges, both immediate and long term.

Now is the perfect time to fill gaps in your AV technology to help students achieve their full learning potential.

We're ready with the AV tools that will help you create consistent and enriched learning experiences.

AV to Equip Spaces for Flexible Learning

■ Recording & Streaming

Connect students to live or on-demand lesson content anytime, anywhere, on any device.

■ AV to USB Bridges

Bring pro quality AV to remote students by integrating cameras, microphones, and voice reinforcement into Teams, Zoom, and more.

■ Collaboration Systems

Enable anyone in the room to wirelessly present content on the classroom display from BYOD devices.

■ AV Control and Automation

Streamline workflows, allowing teachers to walk into a room and get started in minutes.

AMF42AU

Advanced Multi-Format Presentation Switcher

Our AMF42AU is an advanced 4K 4x2 HDMI 4K 60Hz 4:4:4 multi-format presentation switch featuring 3 x HDMI 2.0 and 1 x USB-C input to 2 x HDMI 2.0 and 1x HDBaseT™ output.

- Seamless source switching with manual or auto source selection
- MIC input supports line level or 48V Phantom power
- Advanced Colour Space Conversion (CSC) supports HDMI 2.0 18Gbps specification for HDBaseT
- Features MIC mixer over source audio with independent level adjustment (MIC ducking)

Intuitive AV solutions that optimise the learning experience

Blustream have developed a range of multi-format presentation switchers that feature support of the latest 4K resolutions, seamless switching, USB-C video integration and microphone input with 48V Phantom power, line level volume control and audio mixing. These powerful one-box solutions provide the ultimate cost effective method for plug-and-play connectivity and AV control in larger education environments.

Video over IP

Providing the very best video performance and system scalability to match, Blustream has the perfect VoIP solution for a host of education environments.

IP50HD-TX/RX

Contractor HD Video TX/RX over 100Mbps Network

- Advanced HD video, control and KVM over 1GbE
- Extends HDMI up to a distance of 100m
- Supports unicast transmission over unmanaged networks
- Supports multicast transmission for large managed networks

IP200UHD-TX/RX | IP250UHD-TX/RX 10Gbps UHD Video TX / RX over 1Gb Network featuring Dante®

- IP200UHD and IP250UHD products interoperable for ultimate flexibility
- Dual RJ45 network ports for independent or combined HDMI and Dante® signal distribution*
- SFP port for long distance signal transmission (SFP ports only on IP250UHD)

*Use IP250UHD where Dante® audio connectivity is required

IP250UHD-TX/RX

IP300UHD-TX/RX | IP350UHD-TX/RX 18Gbps UHD Video TX / RX over 1Gb Network featuring Dante®

- IP300UHD and IP350UHD products interoperable for ultimate flexibility
- Supports up to 4K UHD 60Hz 4:4:4
- Dual RJ45 network ports configurable for independent or combined HDMI and Dante signal distribution

*Use IP350UHD where Dante® audio connectivity is required

IP350UHD-TX/RX

IP500UHD-TZ

18Gbps UHD Video Transceiver over 10Gb Managed Network

- Supports HDMI 2.0 18Gbps specification with pass-through for up to 4K 60Hz 4:4:4, and with 10/12-bit HDR sources
- Supports video scaling and single-frame switching
- Features Video Wall, Multi-View, and Picture in Picture options
- Support fixed signal routing function for IR, RS-232, CEC and USB
- PoE+ to power Blustream Multicast products from switch

Specialising in Control & Connectivity for Education & Corporate

KC & KCS Keypad Controllers

- RS232 Ports (KC 6x, KCS 4x, KCS2 2x)
- RS485 (KC only)
- 4x IR ports (KCS2 2x)
- LAN port (PoE) (optional – KC only)
- 4x Input/output ports (KCS2 2x)
- Integrated IR Learner
- Full colour RGB legend-able buttons
- White, Black, Aluminium finish choices
- NebulaStudio™ – Powerful, yet easy to use scripting software
- Intuitive operation

Apollo 42

4x2 Seamless Matrix, Multi-Viewer

- 4x2 Seamless video Matrix
- HDMI 2.0b 4K60 4:4:4 (18G)
- Full up/down scaler – any resolution, any refresh rate
- Multi-View display – Dual, Triple, Quad, PiP
- HDCP 2.2 and HDCP 1.x compliant
- Extensive EDID and HDCP management
- De-embed Audio – Optical Toslink, and L+R Analogue
- VKA – Video Keep Active

Wizard 4U

Wireless Presentation Device with USB Mic/Cam over WiFi

- Pure wireless presentation/collaboration BYOD experience
- Present your video using, Airplay, Miracast, Chromecast, LAN
- 'Touch to Show' using the wireless Wand dongles
- Compatible with mainstream VC platforms – Teams, Zoom, Webex
- Supports Single, Dual, Triple, or Quad view
- Supports wireless Touch Back
- Can transmit back USB Camera/Audio
- Wireless content input up to 1080P

KVM41-U3-18G

Quad HDMI/USB 3.0 KVM Switcher

- 4x1 KVM Switcher with USB 3.0
- HDMI 2.0, 18Gbps – All resolution up to 4K@60Hz 4:4:4, HDR
- 2x HID USB, 2x USB 2.0, 2x USB 3.0 type-A peripherals
- Keyboard hotkey/Mouse hotkey
- L/R Analogue Audio de-embedding
- Supports HDCP 2.2 and HDCP 1.4
- Extensive EDID and HDCP management
- Control – RS232, Hotkey and Front Panel

Taurus UCX is a universal matrix switcher that leverages the ability to combine video, USB, audio, control and Ethernet signals into one **single USB-C cable**, which coupled with the unit's auto switching and advanced room control capabilities provides fast and intuitive set up with no downtime.

Lightware will soon launch **Taurus UCX TX/RX** which allows users to extend USB-C signals with a signal CAT connectivity between TX and RX devices up to 100m. This empowers system architects with bigger flexibility for designing collaborative spaces.

visual engineering LIGHTWARE

VINX series devices were designed for **1G Ethernet** networks and can also operate in point-to-point configuration with diverse application possibilities.

We recommend VINX for applications where scalability, flexibility and rapid deployment are in focus. They are simple to install and to operate, and have numerous built-in services most other manufacturers only provide for an extra cost.

HDMI-TPS-TX86 and **HDMI-TPS-RX86** twisted pair **HDBaseT™** extenders provide extension of **uncompressed Full-HD video** for long distances over a single CATx cable. The unit offers **bi-directional RS-232** and **IR pass-through** on the same CATx cable that carries the video

TPS
TWISTED PAIR SINGLE

The TPS extenders support **full HDCP and EDID compliance** and work at all standard AV resolutions up to 4K and 48-bit color depth handling all standard audio formats and also 120 Hz 3D signals.

Remote powering is available through a single CATx cable, but a local power supply can also be used.

Audio-Visual Signal Management

Kramer Series 3 portfolio

Comprehensive portfolio of fully interoperable audio-visual signal management products

NEW iCAST Mini

A presentation switcher designed for classrooms, conferencing, and corporate training with all the I/O needed to output stunning 4K video to a large display or projector and conferencing applications such as Zoom and MS Teams. An intuitive touch screen interface provides one touch control for source switching, picture-in-Picture, camera angles, and camera auto tracking.

4K Presentation Switcher

Take Control of Your Online Presentations!

Use Datavideo's PTC-305 or PTC-285 (4K UHD) Smart Auto Tracking PTZ camera to enhance your online presentation. The PTC-305/285 advanced auto tracking function uses object tracking.

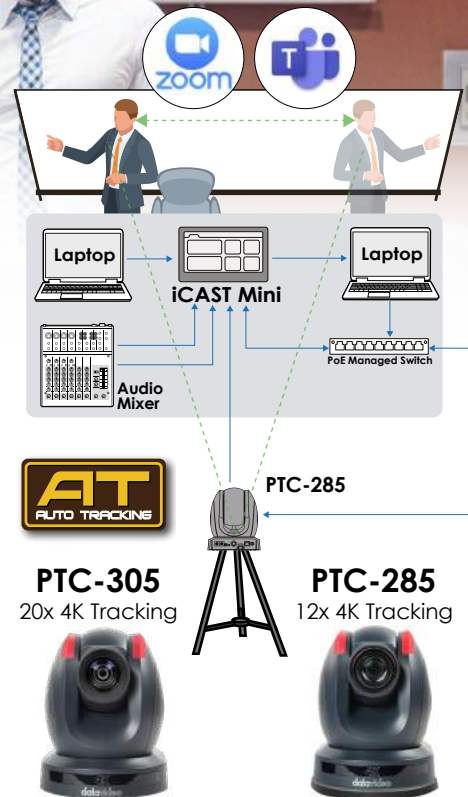

You can adjust camera settings for full, medium and close up shots so that the camera will automatically zoom to the subject.

About Datavideo

Datavideo is known for affordable end-to-end workflow solutions for broadcast and A/V applications which include over 150 products such as cameras, switchers, encoders, recorders, intercoms, converters, and other key products needed for live video production.

5-Series Encoders & Decoders

4K60 4:4:4 Video for Unmatched Colour Depth and Detail

Elevate your installations with Visionary's 5-Series, the perfect solution for delivering stunning visuals, flexible audio routing and advanced network capabilities to meet the demands of today's professional Audio Visual environments.

Visionary's 5-Series 4K60 4:4:4 capable 1GbE Encoders & Decoders set a new benchmark in AV-over-IP technology, combining cutting edge features with proven reliability and performance.

- Single 1GbE LAN Port for PoE, 4K60 4:4:4 Video, Dante®/AES67 & Control
- Secure Network Isolation with VLAN Tagging separates AV Traffic on the Corporate Network
- Built-In Connection for Web Conferencing UC Soft Codec BYOD
- Enterprise Level Security with AES Encryption, 802.1X, HTTPS and SSH
- Isochronous USB2.0 over IP for WebCam Connectivity
- Mass Configuration for Easy System Deployment
- All Decoders Support Auto Video Scaling and Built-In Video Walling
- Audio Return Channel over IP
- Independent Signal Routing to Separate Matrix Video, Audio (Including Dante®/AES67), USB, IR & RS232
- Control from any 3rd Party Control System via the Open API

M4250 SERIES SWITCHES

An entirely new series of switches developed and engineered for the growing audio, video over IP (AV over IP) market. These AV Line switches combine years of networking expertise with best practices from leading experts in the professional AV market.

NETGEAR's Pro AV solutions are engineered specifically for AV over IP with out-of-the-box support for every networked AV solution. Our AV Focused Fully Managed switches come complete with a revolutionary AV GUI simplifying configuration, flexible mounting with ports in the rear or front along with PoE, multi-gig, SFP options and much more!

www.netgear.co.uk/av

NETGEAR® AV

Built for Multicast Audio and Video over IP

M4300 SWITCH SERIES

NETGEAR's M4300 Series of 1G and 10G fully managed switches are designed for any AV over IP installation. A broad range of sizes and capabilities including up to 96 ports in one switch are available to fit any application.

M4350 SWITCH SERIES

The M4350 Series of 1 Gigabit to 100 Gigabit fully managed switches provides an edge to core stackable platform for any AV over IP installation. Redundant modular power supplies on select models contribute to business continuity management.

Certified by over 200+ manufacturers with built in configuration profiles for companies including:

ACTIVE EXTENSION SYSTEM PRO

THE MODULAR SOLUTION FOR
EXTENDING USB 2.0 & 3.0 SIGNALS

Introducing the Lindy USB Active Extension System Pro.

The ultimate solution for extending USB signals. Available in USB 2.0 and USB 3.0 versions. With cutting-edge active extender technology, effortlessly distribute USB signals to single or multiple devices using Lindy USB Active Extension Pro cables and hubs. Unique modular design allows individual or combined use of cables and hub. With impressive distance capabilities of up to 60m (USB 2.0) or 40m (USB 3.0), the Lindy USB Active Extension System Pro breaks the barriers of traditional USB limitations.

PEARL^{MINI}

Simplify video for everyone on campus

The all-in-one media processor perfect for lecture capture, corporate studios & remote broadcasts.

Capture classroom, auditorium and studio cameras plus audio along with your presentation content.

Create custom layouts easily using the intuitive editor. Add branded backgrounds, picture-in-picture, text overlays and more.

Record to local media and publish to your network based storage.

Stream reliably and securely to your chosen platform via RTMP, RTSP or SRT.

Control and manage using the user-friendly touchscreen, web interface, or via the Pearl Mini's advanced integration with leading 3rd party CMS and control systems.

X120

THE WORLD'S FIRST WI-FI PRODUCTION PTZ

- Beautiful images even in low light thanks to its Sony Exmore R Sensor.
- Connect and integrate it however you like, the X120 can output over SDI, HDMI, IP, and USB – all at the same time.
- This is the world's first NDI HX3 capable Wi-Fi PTZ camera, control and streaming all done over the airwaves.
- One cable to rule them all, power, control, and transmission all over a single ethernet cable.

Blackmagicdesign

ATEM MINI PRO

EASY TO USE. FAST TO LEARN

- Connect any HD camera, computer for PowerPoint presentations, or even gaming consoles over HDMI.
- Built-in effects allowing for Picture-in-Picture layouts and Chromakeying for green screen work.
- Outputs to USB and works like a webcam feed to be used in the likes of Zoom, Teams, or Skype.
- Direct streaming without a computer to any RTMP platform like Facebook, YouTube, or Twitch.

Seamless Meeting Experience

A seamless meeting room experience is key and a bad experience can significantly impact the productivity and effectiveness of meetings.

Our meeting room solutions are designed to be user-friendly, intuitive, and easy to navigate, so user can focus on what's important. From the moment users enter the room, they'll be able to start their session with just a few clicks and in the in-room technology will take care of the rest, automatically adjusting the lighting, sound, and video to give you the best possible experience.

Huddly

Jupiter

Easy to Manage

- ✓ **Automatic Updates** – Our technology receives automatic updates, ensuring that they are always up to date with the latest features and security patches without the need to purchase new hardware. This reduces the workload on IT staff and guarantees that our technology is secure and reliable.
- ✓ **Remote Management**- All our technology can be managed remotely which makes it easier for IT manager to troubleshoot issues or update product settings without having to physically have access to the technology.
- ✓ **User-friendly Interface**- Users can easily get started without the need for extensive training as users are able to quickly adopt to the way the technology works, meaning less hassle for IT managers!

Data Tracking

Implementing technology that offers data tracking and analytics provides valuable insights in how users are interacting with the technology, which can be used to improve the user experience, optimise performance, and allocate resources more effectively.

Which meeting rooms are most popular?

- People Counting - How many people are in your meeting rooms?
- Room Popularity - What types of rooms are being used most frequently?
- Room Usage - How are your rooms being used?
- Sound Location Data - Where are people standing/ sitting in the room?
- Trouble Shooting - How is your technology performing?

GoBright provides not just the tools for staff to book available rooms and desks easily, but also empowers management with access to real-time occupancy data, allowing swift planning and adjustment of workplace policies.

Powered by Microphone Mist™ Technology, Nureva's HDL audio conferencing solutions have the power to simultaneously process every audio source in a room and deliver a more natural sense of communication.

Huddly combines hardware, software and AI to create intelligent cameras that are flexible, easy-to-use and software upgradable - for everyone who uses video to collaborate.

As the manufacturer of Microsoft's chosen 21:9 display, Jupiter displays enable the most engaging and intuitive MS Teams rooms yet, using Microsoft's new 'Signature' room layout to ensure that remote participants feel more included than ever before.

Conference, Collaborate, Click!

Discover the new ClickShare Conference

Let the new ClickShare Conference transform your remote meetings. Gone are the frictions when you host a conference from your laptop, or the struggle trying to use cameras and other meeting room equipment. Simply launch the ClickShare Collaboration App or plug in the ClickShare Wireless Conferencing Button.

In less than 7 seconds you're ready to go.

ClickShare

wireless presentation
& conferencing

Create a space where
minds meet. In one click

Simple, easy, wireless. That's how ClickShare shares your content from any device on the meeting room display for better collaboration in any type of meeting room.

With ClickShare Conference you can run better hybrid meetings from your laptop. Thanks to smart, intuitive meeting flows, it takes you only one click to wirelessly start a video meeting with your preferred UC&C platform. Connect automatically to room cameras, speakerphones, sound bars for better video conferencing in the hybrid workplace.

Designed for enterprise rollouts, ClickShare offers enhanced security features, network integration options and cloud management.

All ClickShare processes are ISO-27001 certified.

myViewBoard® Manager Advanced

Cloud based platform to manage all your ViewSonic devices remotely and efficiently

With myViewBoard Manager, IT administrators can securely message, monitor and manage hundreds of enrolled devices 24/7 no matter where they are. Alongside being GDPR compliant, Manager's development team continuously innovates and update our software to keep your school's data safe. As a single-vendor solution, Manager streamlines support and maintenance in the event of the unexpected.

**With a Manager Advanced license, additional tools can be accessed allowing for more robust control of an organisation's devices. Additional features such as broadcast playlists, broadcast messages and multimedia, profiles, task scheduling, user permission management, and remote desktop are offered when a device is designated with a Manager Advanced license.*

Connection through Collaboration

Whether you are looking to improve communication, a better way to host training sessions, or create immersive and engaging lessons, Avocor collaboration display solutions are simply the best way to stay connected.

Engage and **ACTIVELY** interact from any space!

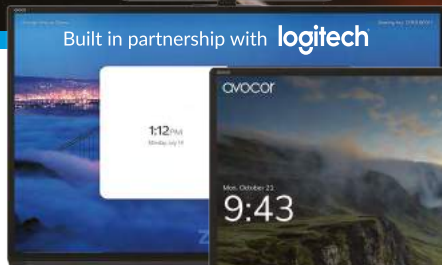

- Make it your own with desktop and small space collaboration
- Collaborate in a shared space
- Expand your virtual and in-person collaboration environments
- Display sizes ranging from 27" to 105" for every type of learning requirement
- Works seamlessly with leading collaboration platforms, including Microsoft Teams, Zoom Rooms, and Google Meet
- Very latest touch technology provides a smooth and extremely accurate, low-latency writing experience

Avocor's seamless and accessible solutions make these an easy to implement ecosystem to empower your teams.

Interactivity changes the way we connect!

- Higher engagement
- Greater retention of information
- Creates a sense of inclusion
- Improves productivity
- Flexibility for all to participate from anywhere

TE14 SERIES IMMERSIVE COLLABORATION FOR EDUCATION AND ENTERPRISE

Today's students are tomorrow's professionals - helping to shape industry, science and progress. Our teachers and leaders demand performance, reliability and flexibility.

The **TE14 SERIES** from iiyama empowers all education, training and presentation environments to seamlessly deliver engaging content, collaborative tools and thanks to our hybrid solution deck of Android 13 and OPS Slot PC features, you can be sure that no matter what your Interactive aspiration, iiyama has the simplified solution just for you.

The new Multi-Screen Display feature allows you to link multiple screens and run as many different applications as you need for dual and triple display integration in large spaces like lecture amphitheatres and large meeting/boardrooms.

The high quality built-in 8 Array Microphone and Dual Directional Speakers support conferencing configurations and our 500Hz Frame Rate Touch sensor delivers the smoothest and fastest Touch response ever seen with added Touch features like Dual Palm Rejection and Anti-Bacterial Pens for safety in multiple user environments.

With sizes from 65", 75" and 86" everyone will benefit from the flexibility and clarity that the **TE14 SERIES** delivers.

- Antimicrobial coating
- Wrapped in shatterproof film

SAMSUNG

Unlimited learning possibilities

The WAC Series is an interactive display that provides an engaging educational experience for the classroom of the future.

This Android-based product offers a familiar and intuitive user experience for teachers and students.

Teachers can boost learning thanks to the display's excellent compatibility and intelligent apps that can be added to the home screen bar for convenience.

WAC Series Interactive Displays

Key features

Android OS

WAC series is an Android OS-based product with intuitive and convenient usability. It has excellent compatibility with Android-based devices, enabling more lively interactive classes with students.

Easy Multitasking

A variety of screen mode options, including split screen mode and multi window mode, make it easy to display and read multiple windows at the same time on the WAC series.

Powerful Screen Sharing

Users can share up to nine screens at once in real time for maximum productivity. With this feature, content can be shared both ways between the large display and individual devices to engage every student.

** Screen sharing is available on devices with the following conditions: Windows 10 and higher / Mac OS X 10.11 and higher / Chrome 38 and higher / Android 5.1 and higher / iOS 10.0 and higher

Intelligent App for Class

Apps and tools can be added to the home screen bar for easy access. Intelligent apps, such as timers and stopwatches, help teachers get creative with their lessons to enrich the learning environment.

Multi-point Touch Drawing

Multiple users can write and draw on the whiteboard at the same time. WAC series enables multi-touch for up to 20 people for enhanced interactivity and productivity.

Dual Pen

Thanks to the double-sided nib applied, users can effortlessly switch between the front pen and back highlighter without needing to change the settings or interrupt their flow.

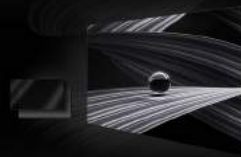

SAMSUNG

The Wall All-in-One

SAMSUNG

Reimagining a better planet with Smart Signage

Resource conservation

Samsung uses recycled resin and plastic waste in its products and packaging, and has developed a screw-less design and glue bonding to reduce waste.

Energy efficiency

Samsung's Smart Signage uses power-efficient components and software that intelligently manages power consumption. This not only reduces electricity use but provides cost savings too.

Non-hazardous substances

Samsung Smart Signage products do not contain harmful substances, ozone depleting substances or substances that are hazardous to the natural environment.

PN-LB and PN-LC Touch

Boost collaborative engagement

The BIG PAD range of smart interactive displays combine BYOD functionality with precision touch for whiteboarding and collaboration.

The logo consists of the words "TK TEAM" in white, bold, sans-serif capital letters, set against a red background that is shaped like a stylized, overlapping 'Z' or a series of horizontal bars.

Improve VC calls, distance learning and hybrid teaching

The idea that you can simply install some AV hardware and 'Hey Presto!'... suddenly have quality video conferencing, distance learning and collaboration isn't always realistic.

"Sorry, but it's boomy at this end" or "Can you speak one at a time" and "the acoustics are terrible" are familiar to anyone who's ever been on a bad VC call.

You may have reverb, feedback, poor acoustics, and a room never intended for audio broadcast or recording. But what to do?

Your problems are over; TK-Team acoustic correction panels can stop reverb and dramatically improve acoustics. These attractive panels can be mounted on walls, ceilings or mobile and the difference a few square metres of panels can make is transformational.

TK-Team panels are 'Class A' conform to EN ISO 11654, ASTM C 423 NRC & SAA and effectively soak up 'human voice level' frequencies.

WriteWall

Full width & height writing surface

Wall-filling potential

WriteWall is a new or retro fit solution that provides a complete area of writable magnetic whiteboard surface. Can be written on with dry-erase, semi permanent, water-soluble or permanent marker, chalk, pen or crayon without damaging the surface.

WriteWall can cover areas up to 3 metres in height by whatever width you require.

Sky

The floating illusion, a reverse bevel seems to lift the surface.

Radia

150mm radiused corners creates a stylish look.

Square

90° corners create a sharp look with colour matching trim.

Tec

A powder coated aluminium trim available in a range of colours.

WriteWall is available with a choice of four edge details

The logo for ScreenInt, featuring the word "screenint." in a white, lowercase, sans-serif font. Below the text is a blue, downward-pointing chevron shape.

There's a ScreenInt for that!

Got a prestigious boardroom refit?

The ScreenInt Raphael screen disappears completely into a discreet ceiling recess when not in use.

Installing in a false ceiling?

ScreenInt's false ceiling trim kit for their Compact and Major models lets you to hide the screen cabinet inside a false ceiling for a clean, aesthetically pleasing look.

Need a screen that never breaks down?

Nil. Zilch. None. That's the number of issues we've had with the ScreenInt Eikon screen. Ideal for schools and higher education where reliability is key.

Whatever the AV installation **#theresascreenintforthat**

Dedicated to excellence

At GVAV, we value our team and their development, investing in ongoing training and certifications to ensure our services are professional and aligned to recognised standards.

With our **AVIXA Gold Membership** and our team's host of certifications achieved via study and support, you can be confident when choosing **GVAV**. Our team are skilled and capable with AVIXA CTS-D (design), CTS-I (installation) and CTS certifications.

Our Project Teams study **PRINCE2** for structured project management systems. As a business, we invest in independently audited quality, environmental, health and safety and information security systems, including ISO 9001, 14001, 45001 and 27001. Our investment this year is greater than ever with our commitment to training and certification providing a firm foundation for our services and support across the UK.

National strength, local service

We're ready to deliver industry-leading audio visual solutions from our six regional UK branches.

With the recent move to our brand new Head Office in Feltham and the addition of our Dundee branch in 2022, we're in the best position to offer a bespoke local service to our customers across the country.

Whether you're looking for a full AV solution, refit of an existing space or just to upgrade some old kit, speak to your local **GVAV** Account Manager.

Find branch contact details on the back of this book - **we are here to help.**

From system design to installation and aftercare

Our expert team are on hand to take your project from the idea stage right through to completion.

With decades of experience, we offer refined solutions delivered by highly skilled designers who know how to realise your AV requirements. With technical teams continuously receiving the latest training, we ensure they have the most up-to-date skills and product knowledge.

No matter the size of your project, we've got you covered.

Maintenance and local support

Customer satisfaction is a top priority, and we pride ourselves on our bespoke local service. Our six regional branches mean we're always able to deliver quality support on our clients' doorstep.

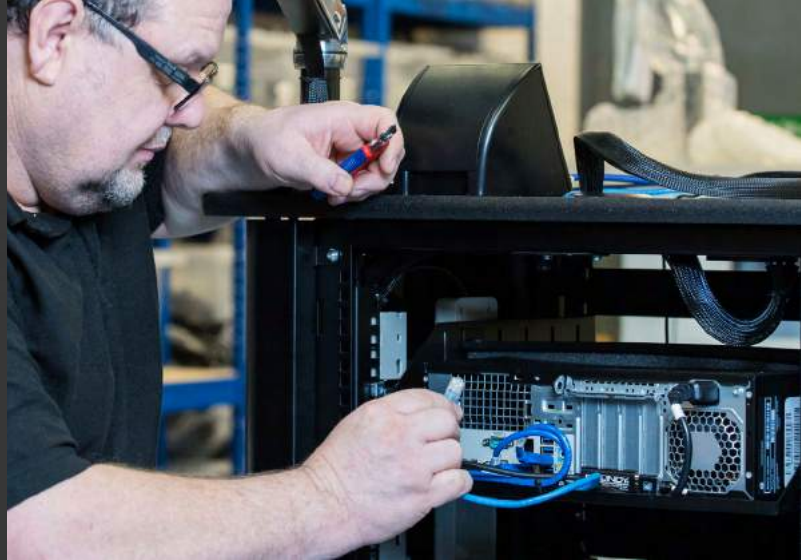

Our maintenance package offers excellent value and ensures your new AV system will run smoothly for years to come. Support services also include access to **GVCORE**, our service desk solution for incident logging.

A full range of services

We deliver a full range of services to make your AV ambitions come to life. Each of our six branches offers a full range of services and support for your local convenience. This includes:

- System design, consultancy and account management
- In-house pre-integration and rack build, programming and testing
- Control system design and integration
- Warehousing and logistics
- Technical training and support

GVAV - a family business

The secret to our success is the people behind the business, with every member of our team passionate and dedicated to developing innovative AV solutions for our customers.

With a heritage dating back to 1976, **GVAV** embraces a family ethos that has run through the business since the beginning.

Now with more than 130 people and with over 45 years in the industry delivering a broad spectrum of projects, **there's nobody better to trust with your audio visual project.**

Forum Lecture Theatre

SCAN ME

"Working with GVAV was a positive experience all round – they worked alongside us to make sure that the new AV system met our needs, delivered the 'wow' factor that we were looking for and created a learning environment that is second to none.

The installation was seamless and the user training provided was positive for the end users. The University look forward to continuing to work with GVAV on future outstanding projects."

University of Hertfordshire - LED

After competitive tendering processes, **GVAV** were appointed to lead an LED revolution across the new state-of-the-art teaching spaces at the University of Hertfordshire, including several signature spaces:

The stand-out feature of this innovative AV upgrade is in the University's new flagship lecture theatre.

A 9 meter wide 4K NEC LED wall, the largest of its kind in UK higher education at the time of install, provides stunning and sharp visuals for all 400 seats in the new **Forum Lecture Theatre**.

The monumental LED wall was chosen as an alternative to projection, offering a bright, immersive display with a long lifespan and easy maintenance.

A Crestron AV over IP (AVoIP) solution was integrated with a bespoke touchpanel, allowing staff to seamlessly and dynamically share content, as well as control the audio, video, lighting and lecture capture in the facility.

Other components of the AV solution include:

- Coriomaster video processor
- An AV rack and a TOP-TEC teaching lectern
- Two comfort monitors at front of stage
- Mersive Solstice
- WolfVision visualizers
- PTZ cameras
- JBL line array speakers, Q-SYS DSP, Shure wireless mic system.

Across campus, the **Prince Edward Hall** tiered lecture theatre has been transformed into a flat-floor teaching space allowing wireless collaborative learning, presentations, breakout learning sessions, and group training tailored for STEM students.

"LED is the biggest untapped area of technology for customers right now. We see it as a display solution for the future because of the flexibility in how you can install it and implement it."

Sukh Basi | Sales Director, GVAV

The centrepiece of Prince Edward Hall is a 4.8m wide NEC HD LED wall. The audio and video distribution, as well as the control system deployed, is a complete Q-SYS end-to-end solution

The Hall is equipped with QSC PTZ cameras for lecture capture, five 65" NEC touchscreens, QSC ceiling speakers, JBL line array speakers, Shure wireless mics processed via existing QSC DSP and Sennheiser mobile connect for an assisted hearing solution.

As well as being a pioneering teaching space, the Hall is now perfectly equipped to play host to big University events like awards ceremonies.

University of Plymouth - SoSC

*Continuing a successful ongoing relationship with the University, **GVAV** were appointed to design and deliver AV installations within the SoSC Crime Simulation Lab. This featured a customisable crime scene inside a mock-up apartment, two interview rooms, observation rooms and a seminar room.*

For this project, each room needed to be connected via a sophisticated network with video and sound capture with recording capabilities.

With an open-plan kitchen and living area as well as a bedroom and bathroom, the mock-apartment allows students to dive into an immersive training experience within a realistic apartment environment.

For video capture, 10 Lumens PTZ IP cameras are fitted across the suite. Three Lumens Compact Camera Controllers were installed across the network to work in partnership with the PTZs, allowing staff and students to intuitively switch to and control any camera on the system.

Audio in the lab is captured by five Audio-Technica omnidirectional mics integrated into the ceiling, with talkback into the lab possible from the other rooms via Audac ceiling speakers. Other audio equipment installed includes a Shure table array mic and JBL speakers.

The interview room tech integrates neatly into a Top-Tec collaborative table alongside power options for other devices. An Iiyama 43" display is mounted as well as integrated Extron control for comprehensive input and output options.

The flexible connectivity options throughout the suite are facilitated by an AV over IP (AVoIP) system, seamlessly connecting all devices in each room on a fast, efficient and secure network.

Students can observe their colleagues in the seminar room with three wall-mounted Iiyama displays alongside a Top-Tec lectern with a 4K WolfVision visualiser.

The new audio visual installation within the School of Society and Culture will serve the University's students for many years to come and solidifies Plymouth University's standing as a world leader in higher education.

University of Hull - DAIM Building

GVAV undertook a full AV fit-out over two floors of DAIM, the **University of Hull's** impressive newest building. The installation included two large computer labs and a large phased array induction loop.

Crestron control technology features heavily within this new installation, with presentation switchers, touchscreens, input and lighting controllers being key components in each computer lab.

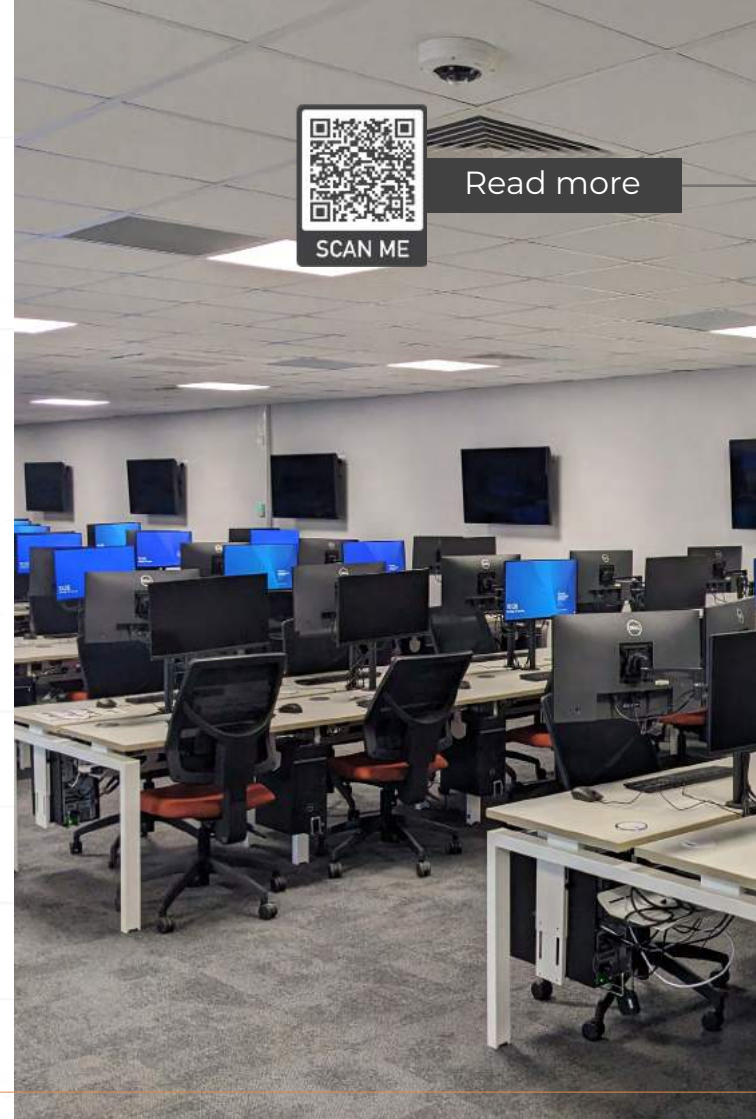

Around the rooms, a total of 26 Panasonic 49" displays were installed and mounted with Unicol tilting wall mounts across a Blustream AVoIP system, giving the presenter full, flexible control.

Both rooms are fitted with custom Top-Tec lecterns which neatly house much of the technical and control equipment. For audio, Extron ceiling speakers and amplifiers were installed, providing full sound coverage across each room for students.

With these comprehensive facilities enhanced by a flexible and collaborative Blustream AVoIP system, the new DAIM building will become an important asset to the University of Hull, adding even more value for their students and enhancing their experience during their time studying.

AV services you can rely on

Six local branches across the UK

GVAV has installed thousands of projects nationwide. With local branches covering the entire country and a central hub of systems and resources, we are ready for any project, no matter the size or complexity.

We have the skills, local resources and experience to take your needs from a concept to a fully integrated and supported audio visual solution.

On hand to help

GVAV provides sales, service and support, accessible via mobile, web or email. Our customers can contact us whenever and wherever they need us. We take customer satisfaction very seriously, so training, support and effective project management are critical to all we do.

Maintenance and support

Our nationwide network of branches means local, experienced engineering resources for our customers. From essential preventative maintenance to site-resident engineers, extended hours and short term events to full operational support, whatever you need, GVAV can help.

Our project, technical, and programming teams ensure your AV projects deliver on every level. We pride ourselves on offering the highest quality products and services, and our customers know they always get great value for money.
